-WORK EXPERIENCE-

**Interned at J.K. Singhania Group, Kanpur —
Face Recognition Based Attendance System (Python)**

Winter (Dec'16 – Jan'17)

Worked on a prototype of a facial recognition alternative to the existing fingerprint scanner based attendance system typically used in an office developed using OpenFace, dlib, and torch libraries based on the HOG approach of face recognition.

**Founding Member, Manipal Information Security Team,
Manipal —**

August 2016 – Present

Co-Founded a club dedicated to spreading awareness about information and network security.

Collaborated on Smoked, an online event where participants are required to look for clues in the given webpage and proceed to the next level.

-PROJECTS-

Helio – A semi virtual assistant (Android)

Manipal – October 2016 – December 2016

Helio is a speech recognition system designed especially for the visually impaired, which is capable of understanding and executing various number of basic tasks based on a person's speech.

Smoked – Online Treasure Hunt (TechTatva '16 MIT)

Manipal – June – October 2016

A complete PHP, MySQL backed website, hosted on AWS and Digital Ocean, which is inspired from the famous game "Notpron" made for the annual tech fest of MIT Manipal. Responsible for the development of the game (using LAMP Stack), the bug fixes and the deployment of the event on AWS servers.

Optio-Web Based Infographic Application

AngelHack Manipal – April 2016

Developed a Flask, MySQL powered website in Angelhack-2016 which compares various statistics about different parts of any city and provides a detailed graphical analysis.

Railway Ticketing System (Django/Oracle)

Manipal – March 2016 – April 2016.
